Re purchasing a duplicate pumping unit for the water-works in Hassan Town Municipility

---

I write to state that the Sanitary Engineer who inspected the water works in Hassan Town observed that there is only one pumping unit of a capacity of 10,000 gallons per hour which is worked 14 to 16 hours a day, that in case of emergency, there is no stand-bye unit and that by providing a double pumping unit both the units could be worked by shifts and that when one of the units has to be repaired the other duplicate unit could be worked etc., With a view to achieve this double benefit and to secure assured water supply the Sanitary Engineer sent an estimate to the Municipal President for Rs 17,241/- for providing a duplicate pumping set for countersignature This estimate has been sanctioned by the Municipal Council at their meeting held on 29-5-48 and they have resolved to request Government for a grant equal to half of the estimated cost

It is stated that necessary provision has been made in the sanctioned budget for the current year under "C" Public works to meet their share of the cost

I request that sanction of Government may kindly be obtained for a grant of Rs 8,620/- out of water supply grant during the current year

The estimate duly countersigned by the Municipal President is enclosed together with a copy of the resolution of the Municipal Council in the matter

Yours faithfully,
L. Nanjundaiah
Deputy Commissioner,
Hassan District
